

RESPONSIBLE AND SUSTAINABLE MANUFACTURING GUARANTEE

THE COMPANY STYLECOW LEATHER SL., with CIF B98916554 guarantees that all the hides and skins we work with are animal by-products destined for the food chain.

All our products are labeled under our **Tiv** brand, registered in the Official Bulletin of Industrial Property of the Spanish Patent and Trademark Office.

Our articles are exclusive and original of our own creation, manufactured in our own facilities by expert artisans, our company being a member of **the Guild of Leather Craftsmen of the Valencian Community, with artisan qualification number (D.C.A N°5850).**

Add to this that our skins are Tanned with vegetable tannins (Vegetable Extracts such as Quebracho, Mimosa and Chestnut among others), being extracted responsibly from the bark and leaves of these mentioned trees.

For all this, we guarantee that the articles produced in our company **do not contain** chemical agents that are harmful to health, are ecological, free of allergens, biodegradable and respectful of the environment.

We also inform that all our suppliers of chemical products comply with the **REACH** regulations, see REACH certificate on our website (www.stylecowleather.com).

For all of the above, we can affirm that all our articles are classified according to international quality standards as "**FULL GRAIN VEGETABLE TANNED LEATHER**", (Full Grain Vegetable Tanned Leather), since the fibers of the superficial part of the leather, which is the most resistant, they remain intact and guarantee maximum durability, while in contact with external agents, a unique and elegant "PATINA" is produced that dramatically improves the appearance of the leather as it ages.
